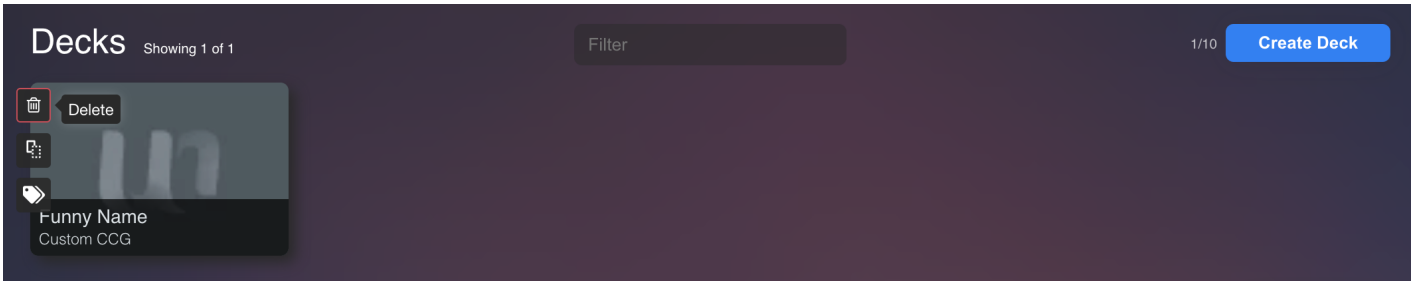
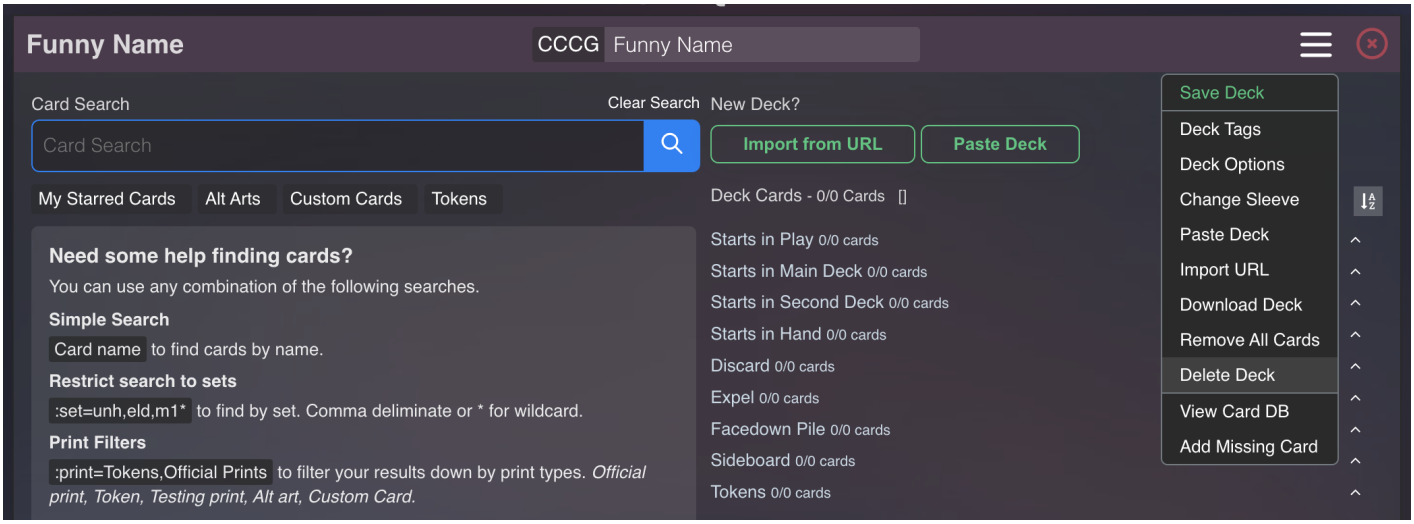
Delete Deck



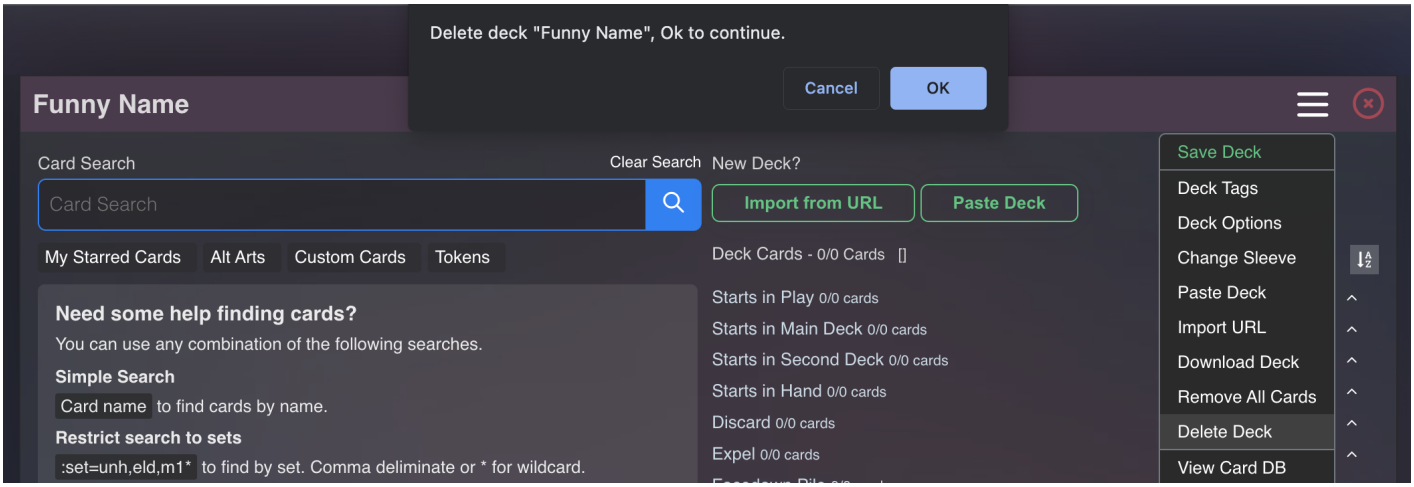
To delete a deck there are **two options**.

1 - From Deck Builder

To delete a deck you can **open the deck in the deckbuilder**.



Then in the **deck menu**, you will find a **"Delete Deck" option**.



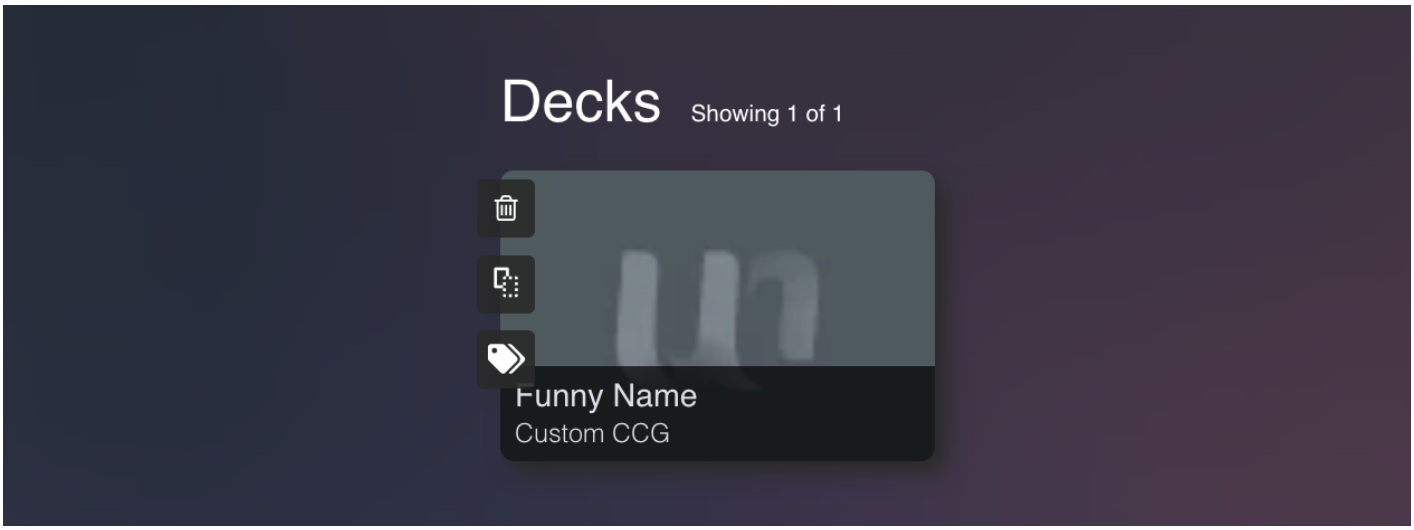
Once you've **confirmed the prompt** the UI should update backto the decklist and the deck is gone.

Congrats

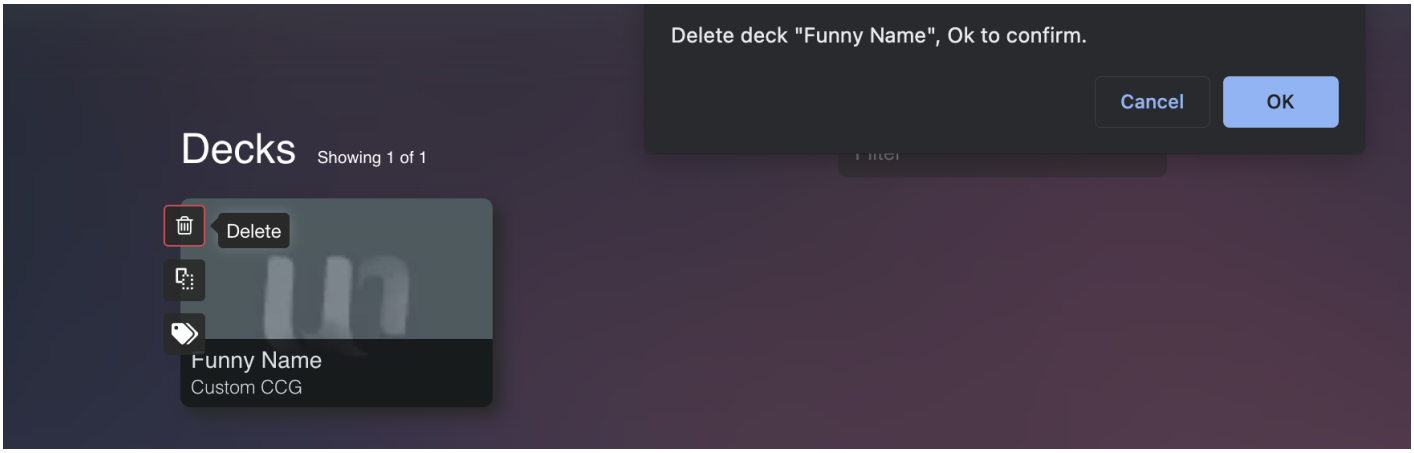
2 - From Deck List

Another way is to **hover your mouse over the deck** in the list, to display these buttons.

> This feature is not available on mobile



Clicking the trash icon , will prompt you to confirm the deletion of the deck.



Once you've **confirmed the prompt** the UI should update and the deck is gone.
