Import from Text

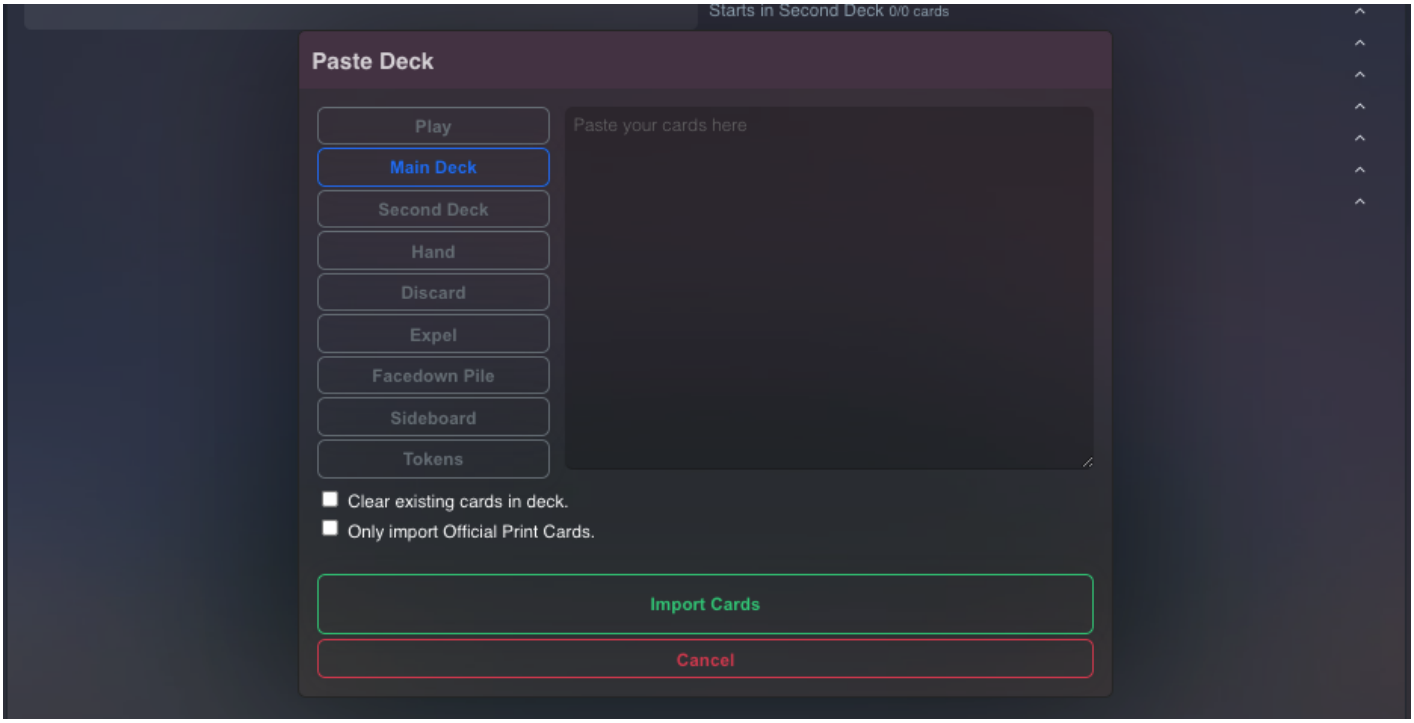

You can import deck with a simple copy paste!

You probably have some decklist on hand you would want to import on Untap to play.
You import these with a simple copy paste

Opening **newly created deck** will display the 2 buttons you see above.
Click the **"Paste Deck"** button.

On an older deck, you will find the option in the deck menu at the top right.

Untap supports a couple formats for each line of text:

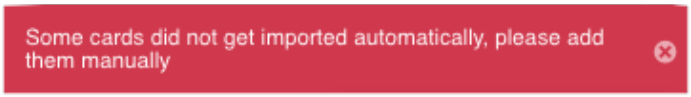

```
1 CardName
```

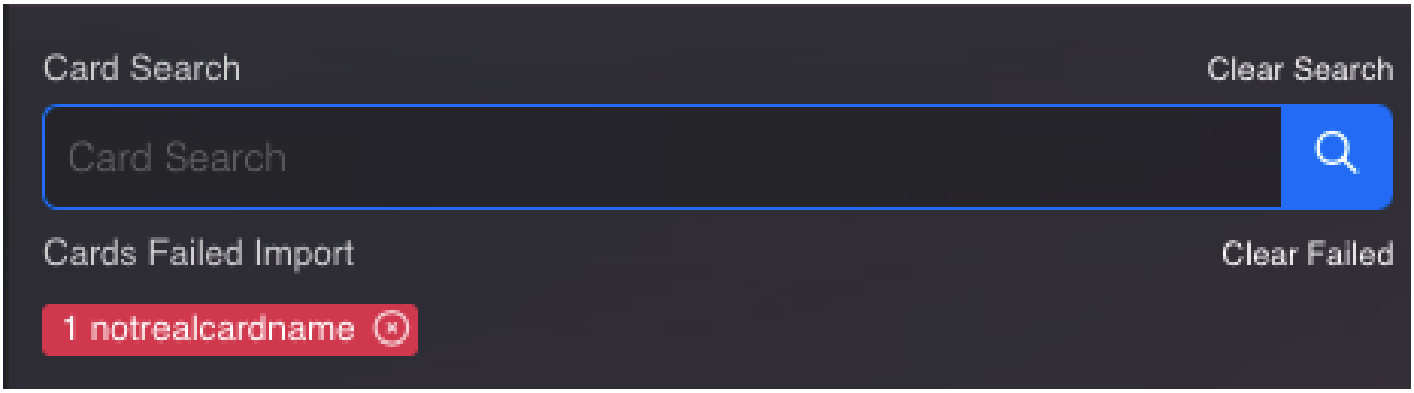

1x CardName
1 CardName (setId)
1x CardName (setId)

You can now **paste the list** and import the cards

Congrats your deck is now imported!

Some of the cards may not be found for multiple reasons.
You will see a notification appear letting you know.

If this happen you will need to **look for and find** the missing cards to add them to your deck.
