

Registration & Validation

Getting started on Untap.in

- Registration
- Validation

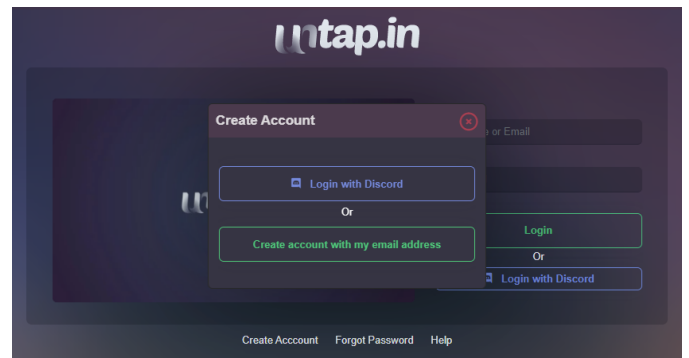

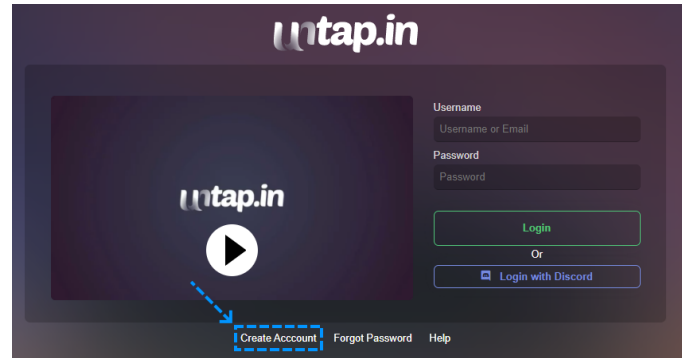

Registration

Registration Steps

To get started, like anywhere else on the world wide web you'll **need to create an account** . Once you're on the Untap.in homepage you will see a login screen, simply **click "Create Account" to create an account** .

Once you have clicked Create Account, you will be met with an option, you could either take the **Blue pill** (Register with Discord) or the **Green pill** (Register with Email).

The Green Pill - Should you choose the traditional route and would like to use your existing credentials, you'll be met with a form to choose a desired username (if not taken), enter your email and a password to access Untap.in with and you'll be able to

Don't forget to take a quick look at the [Privacy Policy](#) and make sure you agree prior to registering.

Validation

Validation Steps	Click on the images to zoom
<p>You may be eager to jump in, slap together a deck and dive head first into a game but WAIT! You'll need to validate the email address on your account before getting too far ahead of yourself.</p>	
<p>Never fear, you should have received an email looking similar to the one on the right that gives you a button to press to validate your account - nice and simple!</p>	
<p>If you haven't received a Validation email, wait up to 30 minutes after receiving the email (and check your spam folder). If you haven't received it and you can't find it in your spam folder, navigate to your Account tab and re-send the validation email.</p>
